

## INST Amp Single ±18V 8-Pin PDIP N Tube

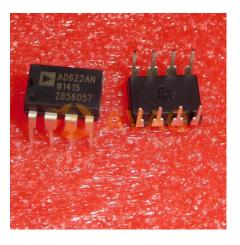

Manufacturer: Analog Devices, Inc

Package/Case: DIP8

**Product Type:** Amplifier ICs

RoHS: RoHS Compliant/Lead free

Lifecycle: Active

Images are for reference only

Inquiry

## **General Description**

The AD622 is a low cost, moderately accurate instrumentation amplifier in the traditional pin configuration that requires only one external resistor to set any gain between 2 and 1000. For a gain of 1, no external resistor is required. The AD622 is a complete difference or subtractor amplifier system that also provides superior linearity and common-mode rejection by incorporating precision laser-trimmed resistors.

The AD622 replaces low cost, discrete, two or three op amp instrumentation amplifier designs and offers good common-mode rejection, superior linearity, temperature stability, reliability, power, and board area consumption. The low cost of the AD622 eliminates the need to design discrete instrumentation amplifiers to meet stringent cost targets. While providing a lower cost solution, it also provides performance and space improvements.

## Key Features Application

Easy-to-use Transducer interface

Unity gain with no external resistor

Low cost thermocouple amplifier

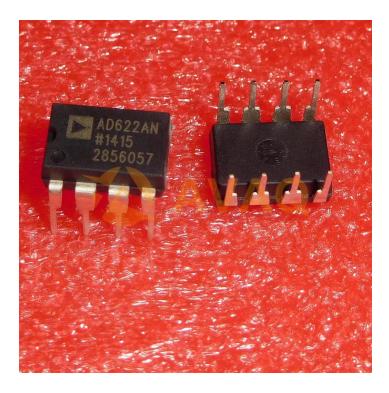

Indefinite output short-circuit duration

Industrial process controls

650mW Internal power dissipation

Difference amplifier

Low cost data acquisition
