

## Video Amp Triple 3.6V 16-Pin QSOP T/R

**Manufacturer:** [Renesas Technology Corp](#)

**Package/Case:** QSOP16

**Product Type:** Amplifier ICs

**RoHS:** RoHS Compliant/Lead free 

**Lifecycle:** Active

### General Description

The ISL59833 is a revolutionary device that allows true single-supply operation of video amplifiers. Designed for systems requiring output swing below ground but lacking a negative power supply, the ISL59833 generates the required negative rail internally from a +3.3V power supply. This allows for DC-accurate coupling of video onto a 75Ω double-terminated line. The buffers have an integrated 6dB, eliminating the need for external gain-setting resistors. An external reference voltage can be applied to the REF pin to shift the analog video level down by the desired amount.

### Key Features

Triple single-supply buffer

Generates negative rail from from single +3.3V supply

No output DC blocking capacitor needed

200MHz -3dB bandwidth

50MHz 0.1dB bandwidth

Fixed gain of 2 output buffer

Amplifier enable/disable function control

Outputs are high impedance in power-down mode

Pb-free plus anneal available (RoHS compliant)
