

AUDIO SOUND PROCESSOR FOR HOME AUDIO

Manufacturer:	ROHM Semiconductor
Package/Case:	SSOP32
Product Type:	Embedded Processors & Controllers
RoHS:	RoHS Compliant/Lead free 
Lifecycle:	Active

General Description

ROHM's sound processors deliver high-fidelity audio, are easy to use, integrate a two-band equalizer, and are compatible with power supply voltages between 4.5V and 9.5V due to low current consumption operation, making them ideally suited for use in portable stereo systems.

Key Features

Using external components, center frequencies and Q factors of the bass characteristics are flexible.

Providing a mute switch onto one of the input pins allows cross-talk suppression.

A surround function can be constructed without external components.

Energy-saving design resulting in low current consumption, by utilizing the BiCMOS process.
