

IXYX100N120C3

Trans IGBT Chip N-CH 1200V 188A 1150mW 3-Pin(3+Tab) PLUS 247

| Manufacturer: | Littelfuse Inc |
|---------------|----------------|
| Package/Case: | PLUS247 |
| Product Type: | Thyristors |
| Lifecycle: | Active |

Inquiry

General Description

Manufactured through the state-of-the-art GenX3TM IGBT process and an extreme-light PunchThrough (XPTTM) design platform, these devices feature highcurrent handling capabilities, high-speed switching abilities, low total energy losses, and low current fall times. They have a positive collector-to-emitter voltage temperature coefficient, making it possible for designers to use multiple devices in parallel to meet high current requirements. Their low gate charges also help reduce gate drive requirements and switching losses. In addition to being avalanche rated, these devices have square Reverse Bias Safe Operating Areas (RBSOA) up to the breakdown voltage- a necessary ruggedness in snubberless hard-switching applications.

| Key Features | Application | |
|-------------------------------------|--|--|
| Optimized for 20kHz-60kHz switching | Battery chargers | |
| Square RBSOA | E-Bikes | |
| Short circuit capability | Laure hallasta | |
| Avalanche rated | Lamp ballasts | |
| Ultra-fast anti-parallel diodes | Power inverters | |
| International standard packages | Power Factor Correction (PFC) circuits | |
| Advantages: | Switched-mode power supplies | |
| Hard-switching capability | Uninterruptible Power Supplies (UPS) | |
| High power density | Welding machines | |
| Low gate drive requirements | in orang machines | |
