

DAC 4-CH R-2R 16-bit 48-Pin SSOP Tube

Manufacturer:	Texas Instruments, Inc
Package/Case:	SSOP48
Product Type:	Data Conversion ICs
RoHS:	RoHS Compliant/Lead free 
Lifecycle:	Active

General Description

The DAC7734 is a 16-bit, quad voltage output, digital-to-analog converter (DAC) with ensured 16-bit monotonic performance over the specified temperature range. It accepts 24-bit serial input data, has double-buffered DAC input logic (allowing simultaneous update of all DACs), and provides a serial data output for daisy-chaining multiple DACs. Programmable asynchronous reset clears all registers to a mid-scale code of 8000h or to a zero-scale of 0000h. The DAC7734 can operate from a single +15V supply or from +15V and -15V, and +5V supplies.

Low power and small size per DAC make the DAC7734 ideal for automatic test equipment, DAC-per-pin programmers, data acquisition systems, and closed-loop servo-control. The DAC7734 is available in a 48-lead SSOP package and offers ensured specifications over the -40°C to +85°C temperature range.

Key Features

Low power - 200mW maximum

Settling time - 10µs to 0.03% FSR

Double-buffered data inputs

Green product and no Sb/Br
