

## IXYH82N120C3

## Trans IGBT Chip N-CH 1200V 200A 1250mW 3-Pin(3+Tab) TO-247AD

Manufacturer:	Littelfuse Inc	The second se
Package/Case:	TO-247	
Product Type:	Thyristors	
Lifecycle:	Active	Images are for reference only

## **General Description**

Manufactured through the state-of-the-art GenX3<sup>TM</sup> IGBT process and an extreme-light PunchThrough (XPT<sup>TM</sup>) design platform, these devices feature highcurrent handling capabilities, high-speed switching abilities, low total energy losses, and low current fall times. They have a positive collector-to-emitter voltage temperature coefficient, making it possible for designers to use multiple devices in parallel to meet high current requirements. Their low gate charges also help reduce gate drive requirements and switching losses. In addition to being avalanche rated, these devices have square Reverse Bias Safe Operating Areas (RBSOA) up to the breakdown voltage- a necessary ruggedness in snubberless hard-switching applications.

Key Features	Application	
Optimized for 20kHz-60kHz switching	Battery chargers	
Square RBSOA	E-Bikes	
Short circuit capability	Lamp ballasts	
Avalanche rated	Power inverters	
Ultra-fast anti-parallel diodes		
International standard packages	Power Factor Correction (PFC) circuits	
Advantages:	Switched-mode power supplies	
Hard-switching capability	Uninterruptible Power Supplies (UPS)	
High power density	Welding machines	
Low gate drive requirements	0
