

DRAM Module DDR4 SDRAM 16Gbyte 288RDIMM Tray

Images are for reference only

Manufacturer: [Micron Semiconductor Products Inc](#)

Package/Case: BGA

Product Type: Memory

Lifecycle: Active

[Inquiry](#)

General Description

MTA18ASF2G72PDZ-2G9E1 is a specific model number for an electronic component. However, without additional context or information, it is difficult to provide detailed specifications or applications for this specific component. MTA18ASF2G72PDZ-2G9E1 appears to be a part number that follows a specific naming convention used by certain manufacturers.

Key Features

Without further details, it is not possible to provide specific features for this component. Typically, electronic components have a wide range of features, including voltage ratings, current ratings, capacitance or resistance values, package types, and operating temperatures, among others.

Application

Again, without more information about the component, it is challenging to determine its specific applications. Electronic components are used in a vast array of devices and systems, including computers, communication equipment, consumer electronics, automotive systems, medical devices, and industrial machinery, among others.
