[Inquiry](#)

Manufacturer: [STMicroelectronics, Inc](#)

Package/Case: TO-220

Product Type: Thyristors

Lifecycle: Active

General Description

This device is an IGBT developed using an advanced proprietary trench gate and field stop structure. This IGBT series offers the optimum compromise between conduction and switching losses, maximizing the efficiency of very high frequency converters. Furthermore, a positive VCE(sat)temperature coefficient and very tight parameter distribution result in easier paralleling operation.

Key Features

High speed switching

Tight parameters distribution

Safe paralleling

Low thermal resistance

Short-circuit rated

Ultrafast soft recovery antiparallel diode
