## General Description

XCF04SVO20C is a type of Field Programmable Gate Array (FPGA) manufactured by Xilinx, a leading provider of programmable logic solutions.

### Key Features

- XCF04SVO20C is a 4Mbit, 3.3V FPGA.
- It has a maximum operating frequency of 20 MHz.
- It has a maximum pin count of 44 pins.
- It has a JTAG programming interface.

### Application

- XCF04SVO20C is commonly used in automotive, industrial, and consumer electronics applications.
- It can be used in microcontroller-based systems to provide additional logic functions.
- It can also be used in digital signal processing (DSP) applications.
