

Configuration SRAM for FPGA

Manufacturer:	<u>Intel Corp</u>
Package/Case:	DIP8
Product Type:	Programmable Logic ICs
Lifecycle:	Obsolete

General Description

EPC1441PC8 is not a commonly known term, but based on the suffix "PC8," it is likely a part number for a specific integrated circuit (IC) packaged in an 8-pin DIP (Dual Inline Package) with through-hole leads. However, without further information or context, it's challenging to provide specific details about this particular part.

Key Features

General description and features of the IC

Electrical characteristics, such as voltage range, current consumption, operating temperature range, etc.

Pinout diagram and functional description of each pin

Timing diagrams and other details of the internal workings of the IC

Recommended operating conditions and precautions

Applications and typical usage scenarios
