### General Description

BZX84C10-E3-08 is a voltage regulator diode that is commonly used in electronic circuits. It is a surface-mount device that is small in size and easy to work with. Here are some of its features:

#### Key Features

- Voltage rating: 10 volts
- Power dissipation: 250 milliwatts
- Maximum continuous forward current: 200 milliamps
- Operating temperature range: -65 to 150 degrees Celsius

#### Application

- Voltage regulation in power supplies
- Signal processing in audio and video equipment
- Protection of sensitive electronic components from voltage spikes
